Sample production checklist

3 A1 plates | 11 parts | About 14h 25m and 208 g total

Name / initials: _____ Run / date: _____

Project: All-Development-Tests-A1-Sliced.3mf | Zero-gap ribbon

Filament slots: 1 white / 2 wood tan / 3 copper silk / 4 Azurite blue

☐ Opened as a project; saved scale, rotations and settings retained.

Ready = cleaned and usable. Mark Redo when a replacement is needed.

PLATE 1 - WHITE FIXTURES (UNCHANGED)

Estimate: 1h 49m / 42 g Started: _____ Finished: _____

Sample / fixture	Printed	Cleaned	Ready	Redo
Glue-test smooth caul	☐	☐	☐	☐
Seam-test smooth caul	☐	☐	☐	☐
Ribbon show-face jig	☐	☐	☐	☐

PLATE 2 - COPPER M TESTS (6 parts)

Estimate: 10h 15m / 127 g Started: _____ Finished: _____

Sample / fixture	Printed	Cleaned	Ready	Redo
Glue test: flat core C1	☐	☐	☐	☐
Glue test: flat core C4	☐	☐	☐	☐
Seam test: flat core C4	☐	☐	☐	☐
Glue test: continuous veneer + fin carrier	☐	☐	☐	☐
Seam test: upper veneer + fin carrier	☐	☐	☐	☐
Seam test: lower veneer + fin carrier	☐	☐	☐	☐

PLATE 3 - ZERO-GAP RIBBON TEST (2 parts)

Estimate: 2h 21m / 38 g Started: _____ Finished: _____

Sample / fixture	Printed	Cleaned	Ready	Redo
Zero-gap refined tongue	☐	☐	☐	☐
Zero-gap refined socket	☐	☐	☐	☐

Plate 1 fixtures already printing remain valid. No fixture reprint is needed.

One ribbon pair replaces A-D: zero visible gap; glue clearance is underneath.

M bodies and ribbon: 8% gyroid; veneers/carriers: 100%.

Before lifting ribbon parts: mark tongue/socket on their backs.

Reprints / print issues: _____

Fit, finish & decision log

Flat-core M samples: dry-fit first; use the matching smooth caul for each sample.

Name / initials: _____ Run / date: _____

VENEER SUPPORT AND CLEANUP

- ☐ Fins and starter shoes stayed attached; veneer was stable during printing.
- ☐ No unacceptable cupping, chatter marks, cracks or visible-face damage.
- ☐ Face cradled in a soft-lined caul while fins, tabs and starter shoe were cut away.
- ☐ Rear remnants trimmed into 0.40 mm recesses; seating pads and locators clean.

GLUE TEST - CONTINUOUS VENEER

- ☐ Core tops flat; joint closes fully.
- ☐ Flat veneer back contacts all 3 stops.
- ☐ Seats with light pressure; no rocking.

Result: ☐ Good ☐ Adjust ☐ Redo

Notes: _____

SEAM TEST - TWO VENEERS

- ☐ Upper/lower veneers dry-fit on core.
- ☐ Faces level; seam edges undamaged.
- ☐ Reflection matches in grazing light.

Result: ☐ Good ☐ Adjust ☐ Redo

Notes: _____

ADHESIVE / CURE RECORD (if bonded)

Product: _____ Mix / batch: _____

Applied: _____ Full cure due: _____ Checked: _____

☐ Dry fits complete before glue. ☐ Cured per adhesive instructions.

Clamp / liner notes: _____

RIBBON ZERO-GAP TEST

Write G = good, A = adjust, R = reprint. Recheck finish and closure after cure, if bonded.

Test / hidden glue space	Dry closure	Face step	Reflection	After cure
Refined / 0.40 mm hidden				

Visible edge: 0.00 mm nominal. Glue relief stays below the show surface.

- ☐ Closes under light pressure; no raised edge or rocking.
- ☐ White, wood and blue edges meet; no glue on cosmetic closing lands.

Ribbon result: _____ Measured edge gap (mm): _____

M veneer result: ☐ Keep ☐ Revise ☐ Reprint Parts: _____

8% trial: rigidity, weight, next density / other observations:
